

SAFe® Product Owner / Product Manager (SAFe® POPM)

Course Description

SAFe® Product Owner / Product Manager (SAFe® POPM) is a designation offered by the Scaled Agile. SAFe® 5 Product Owner/Product Manager (POPM) is a program that helps you develop the skill sets needed to guide the delivery of value in a Lean enterprise. As a Certified SAFe® POPM professional, you will be able to apply the Lean-Agile mindset, SAFe® principles, and practices in the organization, identifying customer needs, write epics, capabilities, features, and user stories, prioritize work to deliver value to the organization, and so on.

This SAFe® POPM training certification program will be ideal for you if you want to:

- Learn tools and techniques to improve your Product Management skills.
- Develop credibility to showcase your Product Management skills.
- Work with customers to identify and prioritize the Product / Solution requirements.
- Explore the best strategies to effectively perform Product Owners / Product Managers roles.
- Learn Product Development and Management in the Scaled Agile environment.

Our SAFe® POPM online live certification training session will be highly interactive, with a lot of discussions and exercises that will help you improve your skills and understanding of how to deliver continuous value in the organization, how to effectively perform the PO or PM role in the Agile Release Train (ART) as it delivers value through Program Increments, how the Continuous Delivery Pipeline and DevOps culture contribute to the relentless improvement of the ART, how to effectively collaborate with Lean Portfolio Management, etc. Our SAFe® APM online live training session will be led by our expert trainers. Everything you learn in our SAFe® POPM online certification training, you can apply to your job as a SAFe® Product Owner / Product Manager. We will help you clear all your concepts related to Agile and will guide you perfectly to grow faster in your career.

FAQs

Q: Is SAFe® POPM certification worth it?

A: This depends on your motive behind doing the SAFe® POPM certification course if you are exploring how to establish yourself as a Product Owner or Product Manager in a large enterprise/solution environment, this program is ideal for you. If your organization is already using SAFe then this is one of the best career investments.

In our observations, the following are the types of professionals who are more seen doing this program frequently.

1. Product Owners who want to grow themselves as Product Manager.
2. Scrum Product Owner looking for performing the same role in a Scaled Agile environment.
3. Project Manager transitioning to the role of Product Manager.
4. Scrum Master transitioning to the role of Product Owner / Product Manager.

Q. What is the difference between SAFe® POPM and CSPO?

A. **SAFe® POPM** – If you want to gain an understanding of the role of a Product Management and Product Owner at a SAFe enterprise level, then this course is for you. Through this course, you will explore the role of the product management and product owner, how to prepare and participate in PI planning, how to make sure of smooth execution of Program and Team Backlogs to deliver the maximum business value at scale. So, if your organization is already using SAFe then this is one of the best career investments.

CSPO – If you want to start your Agile and Scrum Journey by working with Small Agile teams for effective product development, then CSPO is for you. Through this course, you will get the understanding in developing product vision, prioritize product backlogs and making sure optimizing value to delight the customer. So, professionals who want to become a great Product Owner should do it.
